

AUDIO SPLICING

Version 0.1
Computing
COMP120

Alexander Mitchell

This algorithm allows two audio samples to be combined together into a single audio file. Given that s is the first audio sample and t is the second audio sample.

Algorithm 1 Audio Splicing

Ensure:

```
1: function AUDIO SPLICING( $s,t$ )
2:    $n \leftarrow$  LIST
3:   for  $i = 0, i < \text{len}(s)$  do
4:      $n \leftarrow s_i$ 
5:   end for
6:   for  $j = 0, j < \text{len}(t)$  do
7:      $n \leftarrow t_j$ 
8:   end for
9:   return  $n$ 
10: end function
```
